² Revenue Market Share percentages are obtained from BIA's Investing in Television Market Report 2002. BIA states that these percentages are estimates. They are the estimated percent of revenue from the leading stations in the market. These percentages do not take into account revenue from cable advertising, newspapers, other media, or stations in the market that are not considered "leading stations."

Declaration of Kimberly D. Croley

I, Kimberly D. Croley, hereby declare as follows:

1. I am employed as a Legal Assistant at Shaw Pittman LLP, 2300 N Street, NW, Washington, D.C. 20037. I have worked at Shaw Pittman for over two years and previously worked for almost four years at Fisher Wayland Cooper Leader & Zaragoza (which merged into Shaw Pittman). During my employment at Shaw Pittman and Fisher Wayland, I have worked in the communications area and have conducted research on a number of projects.

2. I prepared the exhibit entitled "Combined Audience and Revenue Share of Top Four Stations in Selected Markets." The exhibit lists the top four stations in twenty different markets and their audience and revenue share. I compiled the information from BIA's Television Yearbook 2002 and Investing in Television Market Report 2002. The markets were chosen randomly by selecting every eleventh market out of the 210 listed markets. Once the markets were chosen, I listed the top four television stations in those markets and the audience share from the BIA book. I then combined the stations to find the combined audience shares. I then listed the revenue share set forth by BIA and combined the stations to find the combined revenue shares. This research was conducted from October 16-18, 2002.

Executed this 31 day of December 2002.

Kimberly D. Croley
